Team Blue

We acknowledge that we have read and understood the College's definition and policy on plagiarism. We certify that the source code included in this submission is written by us and only us, except for the following instances.

List of APIs used:

- *Java client API for Player/Stage (javaclient)*
    - Required to interface with the Player/Stage environment and the team's Java control software
- *JFreeChart*
    - http://www.jfree.org/jfreechart/
    - Provides a means to display data sets using detailed statistical graphs in the application
- *Insubstantial (Old name: Substance Look And Feel (LAF))*
    - http://insubstantial.github.com/insubstantial/substance and https://github.com/Insubstantial
    - A cross-platform look & feel software used as an alternative to the built-in Swing LAF to provide a more user-friendly and aesthetically appealing user interface

List of instances of reused code:

- None
